SchoolFusion offers limited compatibility with the JAWS Screen Reading Software, at no additional charge. We currently only offer the accessibility enhanced version of the page to a specific list of users.

JAWS is a program that was developed for computer users whose vision loss prevents them from seeing screen content; it is a product provided by Freedom Scientific. JAWS reads aloud what is on the screen. For more information on JAWS, please visit the Freedom Scientific website, <http://www.freedomscientific.com>

The user that has JAWS activated will utilize these instructions to navigate a page using JAWS:

- Tab to locate a Sub-Menu
- Enter to activate the Sub-Menu
- Arrow Keys to navigate the menu
 - Up and Down to move over the option
 - Left and Right to move into and out of sub-menus
- Enter to activate the menu Item.
