

H. F. Stevens Middle School

Emergency Action Plan and Severe Weather Protocols

This handbook is to provide coaches and administrators with an Emergency Action Plan should EMS be activated for emergencies or in case of severe weather conditions. Severe weather and emergencies may arise at any time during athletic events. Since weather is unpredictable, you can never give exact guidelines. Good common sense should also be utilized. Severe weather is defined as any weather-related situation requiring all athletes and spectators to move to safe shelter. Expedient action must be taken in order to prevent life threatening conditions. Student safety is a priority over the completion of an athletic event.

Coaches and administrators should be aware of the following protocols in order to be prepared should severe weather or emergency arise. These protocols are in accordance with UIL and state law mandates and in conjunction with CISD policies and procedures.

CISD CHAIN OF COMMAND

Emergency Contacts

Crowley ISD Athletic Director: Gregory Williams, 817-297-1000, gregory.williams@crowley.k12.tx.us

Crowley ISD Police Chief: Chief Maston, 817-297-5292, leshai.maston@crowley.k12.tx.us

Crowley HS Campus Principal: Markeba Warfield, 817-297-5810, markeba.warfield@crowley.k12.tx.us

Crowley HS Athletic Coordinator: Carlos Lynn, 817-297-5810, carlos.lynn@crowley.k12.tx.us

Crowley HS Assistant Athletic Coordinator: Chrystal Thomas, 817-297-5810, chrystal.thomas@crowley.k12.tx.us

Crowley HS Field House Athletic Trainer: Lou Watanabe, 817-297-5810, lou.watanabe@crowley.k12.tx.us

Crowley HS Gym Athletic Trainer: Tara Sherman, 817-297-5810, tara.sherman@crowley.k12.tx.us

Crowley HS & HF Stevens MS Athletic Trainer: Ashley Daniels, 817-297-5810, ashley.daniels@crowley.k12.tx.us

Crowley HS & Richard Allie MS Athletic Trainer: Tatum Jones, 817-297-5810, tatum.jones@crowley.k12.tx.us

Crowley HS 9th Grade Campus Principal: Roslyn Bell, 817-297-5845, roslyn.bell@crowley.k12.tx.us

HF Stevens MS Campus Principal: Andrea Robins, 817-297-5840, andrea.robins@crowley.k12.tx.us

HF Stevens MS Boys Athletic Coordinator: Julius Perkins, 817-297-5840, julius.perkins@crowley.k12.tx.us

HF Stevens MS Girls Athletic Coordinator: Niela Gray, 817-297-5840, niela.gray@crowley.k12.tx.us

Richard Allie MS Campus Principal: Chris White, 817-297-5394, christopher.white@crowley.k12.tx.us

Richard Allie MS Boys Athletic Coordinator: Dorian Floyd, 817-297-5394, dorian.floyd@crowley.k12.tx.us

Richard Allie MS Girls Athletic Coordinator: Margaret Amos, 817-297-5394, margaret.amos@crowley.k12.tx.us

Safety Training

Senate Bill 82, in effect since the 2007-2008 school year, related to safety regulations for certain public-school extracurricular activities.

This legislation:

1. Requires safety training for all coaches or sponsors for athletic activities, and any marching band director. UIL has developed a safety training program for coaches and sponsors of athletic activities that is available through the UIL Online as part of the Rules Compliance Program. [Visit the Rules Compliance Program to complete Safety Training.](#)

[Additional information from the Texas Administrative Code, Chapter 76.1003, on these requirements as they pertain to athletic trainers and team physicians.](#)

2. Mandates that schools, at least once per year, conduct a safety drill that incorporates the training described in the safety training program developed by UIL.
3. Requires that student athletes be provided training in recognizing symptoms of catastrophic injuries, including head and neck injuries, concussions, asthma attacks, heatstroke, cardiac arrest and injuries requiring use of an AED, the risks of using nutritional supplements. This training can be conducted by the school, using the materials available on the SB 82 portion of the Health and Safety Section of the UIL web site. [Download safety training Powerpoint presentation.](#) (revised September 2017)
4. Mandates that unsafe athletic activities are prohibited and schools must make sure that safety precautions are required (asthma medication, hydration materials present, emergency lanes clear etc.)
5. Requires that any student who is rendered unconscious while participating (in practice or game) cannot participate further in that practice or game any more and must get written clearance prior to any further participation.
6. Mandates that records of compliance with the requirements of the legislation be kept and be made public upon request.
7. Requires that non-compliance with the provisions of the bill could subject the school to penalties as outlined in section 27 and 29 of the Constitution and Contest Rules.
8. Mandates that the Texas Education Agency create hotline number and email address for reports of non-compliance and schools must post that information in their administration offices. To report complaints or violations, contact the Curriculum Division of the Texas Education Agency by phone at 512-463-9581 or by email at curriculum@tea.state.tx.us.
9. Requires the text of sections of bill as well as the Parent Information Manual must be provided to parents of participants. The bill does allow that the required materials can be provided electronically, unless specifically requested otherwise.

Severe Weather Protocols

Chain of Command

The Office of School Administration, the Athletic Coordinators, the Game Day Administrator and the Athletic Trainers will work together to implement the policy at the time of the event. The Athletic Trainers will have a weather watcher that monitors the forecast. Contracted trainers will contact Middle School and High School Coordinators and High School Trainers. Middle School and High School Athletic Coordinators will contact campus Principals.

Lightning Protocol

WeatherSentry Monitoring System: CISD utilizes the Weather Sentry monitoring system that provides all current/real time alerts and information using radar detection of predetermined points of reference that include an Advisory area (20 mile circumference), a Caution Area (15 mile circumference) and a Warning Area (8 mile circumference) around athletic venue. Alerts are sent through text messages and other means to participating coaches, athletic trainers, and administrators giving specific instructions and information regarding inclement weather situations. This means of observation should be utilized before any other to determine safety and subsequent changes in schedules (ie: postponements, cancellations, evacuations...etc)

The 30-30 Lightning Safety Rule: Using the **Flash-to-Bang** method will be our primary way of tracking a storm. Thunder always accompanies lightening. The audible range of thunder is 8-10 miles. Light travels at the speed of 1 mile every 5 seconds.

To use the **Flash-to-Bang** method, count the number of seconds once lightening is sighted until the thunder is heard. Divide by 5 to determine how far away, in miles, the lightening is occurring. Play is suspended when the **Flash-to-Bang** method reaches 30 seconds or less. This means the lightning storm is 6 miles away or closer.

Skyscan Lightning Detector: The Skyscan lightning detector will be used as a secondary source to the **Flash-to-Bang** method. The Athletic Trainer will monitor the Skyscan. This instrumentation is effective but cannot guarantee safety. This unit is only used to track the stages of potential lightning. If two consecutive readings in the 3-8 mile range or closer are observed on the monitor, the field will be cleared.

Resumption of Play: Resumption of play occurs when lightning has not been detected for 30 minutes. Every time lightning is detected within the 8 mile or less range, the 30-minute clock will restart. The administrator on duty will make the final decision as to whether a contest will be suspended or postponed.

List of Safe Locations: A safe location is any large enclosed building with plumbing and/or electrical wiring that is used to ground the structure. The secondary safe location is in any vehicle with a hard metal roof, such as a personal vehicle or school bus. Do not touch the sides of the vehicle. While in the safe location, stay away from metal objects, phones and computers that have a land line (cell phones are acceptable).

Places to Avoid: Avoid any structure that has an exposed opening such as metal sheds and baseball/softball dugouts. Also avoid high places, open fields, trees, bleachers, metal fences, and open water.

Field Conditions: The following guidelines will be used to determine alterations to practice and game schedules due to inclement weather. The occurrence and distance of lightning will be determined from a weather verification service. Decisions on contests will be made accordingly. **Athletic Coordinators will contact the Office of District Safety and Security at 817-297-5292.**

Hot Weather Protocol

CISD will follow the recommended policy for conducting practices, conditioning workouts, walk throughs and games in all sports during times of extremely high heat and/or humidity for all UIL sanctioned athletic events. New research has found the gold standard for implementation of heat illness policy is to use the Wet Bulb Globe Temperature as a means to track appropriate conditions for outside activity and therefore mitigate the chance of Exertional Heat Illness. This policy shall follow modified guidelines of the American College of Sports Medicine in regard to:

1. The scheduling of practices at various heat/humidity levels
2. The ratio of workout time to time allotted for rest and hydration at various heat/humidity levels.
3. The heat/humidity level that will result in practice being terminated.

As environmental temperature and humidity increase, there is an increase in the heat stress that is placed on the exercising individual. Exercise in the heat causes athletes to rely on evaporation of sweat from the skin as the primary method of dissipating heat that is produced by the working muscles. As humidity increases, the ability to dissipate heat through evaporation is further hindered, thus causing the body to have an increased body temperature, which increases the risk of EHS

A Wet Bulb Globe Temperature (WBGT) device is a measurement tool that uses ambient temperature, relative humidity, wind, and solar radiation from the sun to get a measure that can be used to monitor environmental conditions during exercise. Establishing WBGT guidelines that dictate modifications in activity (work:rest ratios, hydration breaks, equipment worn, length of practice) at given WBGT temperatures play a huge factor in helping to prevent EHS.

HOW DO WE GET OUR NUMBERS?

When establishing WBGT guidelines for physical activity, the guidelines must be region (geographic) specific. For example, an athlete playing football in Texas may be accustomed to warm environmental conditions, unlike a football player from Maine. A football player practicing in 90°F temperatures in Texas could be comfortable whereas a football player practicing in the same conditions in Maine could be experiencing the worst conditions they have felt all year, which would increase the risk of heat illness.

The map and the following table, also adopted from [Grundstein et al. Regional heat safety thresholds for athletes in the contiguous United States. Appl. Geography. 2015.pdf](#), provides a guideline for modification of activity based on the environmental conditions in each region.

Cat 3	Cat 2	Cat 1	Activity Guidelines
< 82.0°F < 27.8°C	< 79.7°F < 26.5°C	< 76.1°F < 24.5°C	Normal Activities – Provide at least three separate rest breaks each hour with a minimum duration of 3 min each during the workout.
82.2 - 86.9°F 27.9-30.5°C	79.9 - 84.6°F 26.6-29.2°C	76.3 - 81.0°F 24.6-27.2°C	Use discretion for intense or prolonged exercise; Provide at least three separate rest breaks each hour with a minimum duration of 4 min each.
87.1 - 90.0°F 30.6-32.2°C	84.7 - 87.6°F 29.3-30.9°C	81.1 - 84.0°F 27.3-28.9°C	Maximum practice time is 2 h. For Football: players are restricted to helmet, shoulder pads, and shorts during practice. If the WBGT rises to this level during practice, players may continue to work out wearing football pants without changing to shorts. For All Sports: Provide at least four separate rest breaks each hour with a minimum duration of 4 min each.
90.1 - 91.9°F 32.2-33.3°C	87.8 - 89.6°F 31.0-32.0°C	84.2 - 86.0°F 29.0-30.0°C	Maximum practice time is 1 h. For Football: No protective equipment may be worn during practice, and there may be no conditioning activities. For All Sports: There must be 20 min of rest breaks distributed throughout the hour of practice.
≥ 92.1°F ≥ 33.4°C	≥ 89.8°F ≥ 32.1°C	≥ 86.2°F ≥ 30.1°C	No outdoor workouts. Delay practice until a cooler WBGT is reached.

Based on the above map and table, Crowley ISD and its affiliated schools would follow the guidelines for Category 3. The following table will be used to determine activity. Modifications have been made for middle school athletes as they are less likely to have had access to and been acclimated to summer strength and conditioning and predominantly have far different physiological makeups and body maturation.

WET BULB GLOBE THERMOMETER		ACTIVITY GUIDELINES & REST BREAK GUIDELINES
Middle School	High School	
< 82	< 82	<p>Normal Activities: Provide at least 3 separate rest breaks each hour with a minimum duration of 3 minutes each.</p> <p>Use discretion for intense or prolonged exercise.</p>
82.1 – 83.9	82.1 – 86.9	<p>Use discretion for intense or prolonged exercise; watch at-risk players carefully; provide separate rest breaks each hour for a minimum of 4 minutes duration each.</p>
84.0 – 86.9	87.0 – 89.9	<p>Maximum practice time is 2 hours each.</p> <p>Football: players are restricted to helmet, shoulder pads, and shorts during practice. If the WBGT rises to this level during practice, players may continue to <u>workout</u> wearing football pants without changing to shorts.</p> <p>All Sports: provide at least 4 separate rest breaks each hour with a minimum duration of 4 minutes each.</p> <p>Consider delaying or rescheduling competitions.</p>
87.0 – 90.0	90.0 – 92.0	<p>Maximum practice time is 1 hour.</p> <p>Football: NO protective equipment may be worn during practice, and there may be NO conditioning activities.</p> <p>All Sports: there must be 20 minutes of rest breaks distributed throughout the hour of practice.</p> <p>Consider delaying or rescheduling competitions.</p>
> 90	> 92	<p>NO Outdoor Workouts: cancel or delay practice and competitions until a cooler WBGT is reached.</p>

Implementation of the policy will be overseen by CISD Athletic Director, with the aide of all Campus Coordinators, Athletic Trainers, and Head Coaches. Readings will be recorded by campus ATs to document compliance.

Directions for Implementation:

- Readings will be taken using the district approved WeatherSentry DTN weather app for WBGT and monitored using the apps warnings via text to all involved parties. Secondary options will be handheld devices kept by campus ATs and readings will be checked 30 minutes prior to activity and every hour after.
- The “timer” starts when the first group of athletes hit the field.
 - Should programs be split up into subgroups, it is the responsibility of the coaches to make sure that they keep track of all athletes and their exposure times.
 - Ex: Defense goes outside while Offense is in weight room. The restrictions for the start of practice is MAX 1 hour. Position coaches will have to ensure that each athlete in the group follows that guideline. They will need to identify athletes who may be required to get reps in both Defense and Offense and make sure they stay within their hour.
- The temperature and corresponding guideline remains absolute unless temperatures RISE and guidelines become more restrictive.
 - Ex: Beginning Temp is 88.3. The guideline are in ORANGE zone and calls for MAX 2 hours. If temps rise 30 minutes after start and fall into RED zone, then Red zone rules will apply. Athletes will only be allowed one hour MINUS the previous time spent out.
 - Ex: Beginning Temp is 91.1. The guidelines are in RED zone and calls for MAX 1 hour. If temps drop 30 minutes into start and fall back into ORANGE zone, the guidelines remain the same. Core temperatures have already been pushed to their limits and will not decrease significantly enough to be safe. Max will remain at 1 hour.
- Gradually Acclimatize Athletes
 - Get them accustomed to working out in the heat. A gradual acclimatization for the student(s) to hot/humid conditions is a must. We advise gradual increase exposure to hot and/or humid environmental conditions over a period of 7 to 10 days for students to achieve acclimatization.

- Football – These athletes will use the mandatory UIL calendar and guidelines for acclimatization.
- Cross Country - These athletes must be monitored closely at all times. Running distance should be increased gradually
- Volleyball and Basketball (indoor sports) - Coaches should be aware that heat problems can occur indoors if the athletes are not properly hydrated. If a coach chooses to practice outdoors, he/she should be aware of the weather conditions. These athletes will not be accustomed to the heat outdoors. They MUST be monitored very closely and water should be readily available.
- Soccer, Track, Tennis, Baseball and Softball - The first 3-4 practices should not be overly strenuous. Overuse/friction injuries will be dramatically decreased in these sports if athletes start workouts at 50% and ease in to a full 100%. This usually takes two to three weeks for track athletes.
- Identify Susceptible Athletes
 - Those athletes that are obese or have a larger muscle mass tend to have more heat related problems. Keep a close eye on these athletes.
 - Athlete who come in late to programs need to be monitored and acclimated appropriately. They should not just jump in full go with the more advanced athletes.
- Uniforms
 - Use lightweight, breathable jerseys/pants in hot weather months. Watch for athletes wearing extra clothing.
- Hydration and Rest Breaks
 - Rest time should involve both unlimited hydration intake (water or electrolyte drinks) and rest without activity involved.
 - For Football: Helmets should be removed during rest time.
 - The site of rest time should be a “cooling zone” and not in direct in sunlight when available.
 - Ice towels, spray bottles filled with ice water and cold immersion tubs should be available at the “cooling zone” for the benefit of any player showing early signs of heat illness.
 - Athletes should have unlimited access to cold water at all times. **DO NOT RESTRICT WATER AS A FORM OF MOTIVATION!**
- Encourage a Good Diet
 - Athletes MUST eat breakfast/lunch to workout in extreme heat. Fat intake should be somewhat decreased. Salt intake can be slightly increased. Athletes should stay away from carbonated beverages in season.

Cold Weather Precautions

Cold exposure can be uncomfortable, increase the risk of injury, and impair performance. Factors to take into consideration include more than just the temperature. Wind chill and wet conditions will increase the cooling effect. Wind Chill interacts with the temperature to significantly increase body cooling. The combination of cold air and the deep breathing of exercise can also trigger breathing problems. If the body and clothing are wet, there is an increase of body cooling. This could be from sweat or rain.

1. **Dress in layers** - Athletes should dress in layers and try to stay dry. Heat loss from the head and neck can be as much as 50% of total heat loss; therefore, the head should be covered during very cold conditions.
2. **Warm-up** - Adequate warm-up is essential to prevent injuries, especially in cold conditions. Try to keep warm throughout the practice or contest.
3. **Stay Hydrated** - Dehydration affects the body's ability to regulate temperature whether it is hot or cold conditions.
4. The Office of School Administration will communicate with Fine Arts.

The following guidelines will be used to determine alterations to practice and game schedules due to cold conditions. The temperature and wind chill readings will be taken from a weather verification service. Decisions on contests should be made by 12:00pm of the day of the contest. **Athletic Coordinators will contact the Office of School Safety and Security at 817-297-5255.**

Temperature is 32 degrees or above with Wind Chill below 26 degrees

Daylight activities may continue following the guidelines above.

Evening activities will not be played.

Temperature is below 32 degrees with Wind Chill below 26 degrees

All activities are moved indoors or canceled.

*Wet weather could add to the possibility of canceling activities or moving them indoors.

Emergency Action Plans

Introduction

Emergencies may arise at any time during athletic events. The development and implementation of an emergency plan will help ensure the best care. Athletic organizations have a duty to develop an emergency plan which, when activated, will provide appropriate standards of emergency care to all sports participants. As athletic injuries may occur at any time and during any activity, the sports medicine team must be prepared. This preparation involves formulation of an emergency plan, proper coverage of events, maintenance of appropriate emergency equipment and supplies, utilization of appropriate emergency medical personnel, and continuing education in the area of emergency medicine and planning. Our goal is that through careful pre-participation physical screenings, adequate medical coverage, safe practice and training techniques and other safety avenues, some potential emergencies will be averted and all managed appropriately.

Components of the Emergency Plan

1. **Establish Scene Safety and Immediate Care of the Athlete by Emergency Personnel**
With athletic practice and competition, the first responder to an emergency situation is typically a member of the athletic staff, most commonly a coach or athletic trainer. The type and degree of sports medicine coverage for an athletic event may vary widely, based on such factors as the risk level of the sport or activity, the setting, and the type of training or competition. Certification in cardiopulmonary resuscitation (CPR) and automated external defibrillators (AED), athletic safety training, prevention of disease transmission, and emergency plan review is required annually for all athletics personnel. The emergency team may consist of a number of healthcare providers including physicians, emergency medical technicians, licensed athletic trainers; student athletic trainers; coaches; administrators. There are four basic roles within the emergency team. The first and most important role is establishing safety of the scene and immediate care of the athlete. Acute care in an emergency situation should be provided by the most qualified individual on the scene. In instances that an Athletic Trainer is available, this role will be assumed by the Athletic Trainer. The second role, EMS activation, may be necessary in situations where emergency transportation is not already present at the sporting event. This should be done as soon as the situation is deemed an emergency or a life-threatening event. Time is the most critical factor under emergency conditions. Activating the EMS system may be done by anyone on the team. However, the person chosen for this duty should be someone who is calm under pressure and who communicates well over the telephone. This person should also be familiar with the location and address of the sporting event. The third role, emergency equipment retrieval may be done by anyone on the emergency team who is familiar with the types and location of the specific equipment needed. Student athletic trainers, coaches, and athletes are good choices for this role. The fourth role of the emergency team is that of directing EMS to the scene. One member of the team should be responsible for meeting emergency medical personnel as they arrive at the site of the emergency. Depending on ease of access, this person should have keys to any locked gates or doors that may slow the arrival of medical personnel. An administrator, coach, student athletic trainer, or athlete may be appropriate for this role.
2. **Activation of the Emergency Medical System**
Activate EMS by calling 911. Proper communication is the key to quick emergency response. Athletic trainers and emergency medical personnel must work together to provide the best emergency response. Access to a working telephone should be assured before athletic events.
3. **Emergency Equipment Retrieval**
All necessary emergency equipment should be at the site and quickly accessible when emergency situations arise. Personnel should be familiar with the function and operation of each type of emergency equipment. Equipment should be in good operating condition, and personnel must be trained in advance to use it properly. Emergency equipment should be checked on a regular basis and use rehearsed by emergency personnel.
4. **Direction of EMS to Scene**
Emphasis should be placed at having an ambulance on site at high-risk sporting events. There should be a designated location with rapid access to the site and a cleared route for entering/exiting the venue. Ambulance entrance to each facility should be clearly marked and accessible. Personnel should be assigned to meet the ambulance and assist with doors, gates and access to the site. In the medical emergency evaluation, the primary survey assists the emergency care provider in identifying emergencies requiring critical intervention and in determining transport decisions. Emergency care providers should refrain from transporting unstable athletes in inappropriate vehicles. Any emergency situations where there is impairment in level of consciousness (LOC), airway, breathing, or circulation (ABC) or there is neurovascular compromise should be considered a "load and go" situation and emphasis placed on rapid evaluation, treatment and transportation.

Conclusion

Through development and implementation of the emergency plan, the Crowley Independent School District helps ensure that the athlete will have the best care provided when an emergency situation does arise.

AED Locations:

1st Location: Main Gym hallway by restrooms.

2nd Location: Main Building in band hall hallway.

HFSMS Gyms

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
 - a. Keep bystanders away from scene
 - b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
 - c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
 - a. Making the Call: **911**
 - b. Providing Information: **940 North Crowley Road**
 - i. name, address, telephone number of caller
 - ii. nature of emergency
 - iii. number of injured persons
 - iv. condition of injured persons
 - v. medical treatment of injured persons
 - vi. specific directions to locate emergency scene
 - vii. other information as requested by dispatcher
 - c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
 - a. Retrieve AED
 - b. Medical kit with emergency forms
 - c. Splint bag as needed
4. Direction of EMS to scene
 - a. Provide specific directions to locate emergency scene:
HFSMS Gyms access at southeast corner double doors of campus.
 - b. Assign someone to wait outside and bring EMS to scene
 - c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
 - a. Notify guardians or next of kin of injured persons
 - b. Assign a staff member to accompany injured persons to hospital when available
 - c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.

Safe Shelter will be:

Main Building

All athletes, coaches, and spectators will proceed to main part of building and get into hallways. CISD

Administrators and security will facilitate. Stay away from doors and windows.

AED Location:

1st Location: **Main Gym** hallway by restrooms.

2nd Location: **Main Building** in band hall hallway.

HFSMS Weight Room – (Inside Gym)

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
 - a. Keep bystanders away from scene
 - b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
 - c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
 - a. Making the Call: **911**
 - b. Providing Information: **940 North Crowley Road**
 - i. name, address, telephone number of caller
 - ii. nature of emergency
 - iii. number of injured persons
 - iv. condition of injured persons
 - v. medical treatment of injured persons
 - vi. specific directions to locate emergency scene
 - vii. other information as requested by dispatcher
 - c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
 - a. Retrieve AED
 - b. Medical kit with emergency forms
 - c. Splint bag as needed
4. Direction of EMS to scene
 - a. Provide specific directions to locate emergency scene:
HFSMS Weight Room access at southeast corner double doors of campus.
 - b. Assign someone to wait outside and bring EMS to scene
 - c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
 - a. Notify guardians or next of kin of injured persons
 - b. Assign a staff member to accompany injured persons to hospital when available
 - c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.

Safe Shelter will be:

Main Building

All athletes, coaches, and spectators will proceed to main part of building and get into hallways. CISD Administrators and security will facilitate. Stay away from doors and windows.

AED Location:

1st Location: **Main Gym** hallway by restrooms.

2nd Location: **Main Building** in band hall hallway.

HFSMS Fine Arts Hall

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
 - a. Keep bystanders away from scene
 - b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
 - c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
 - a. Making the Call: **911**
 - b. Providing Information: **940 North Crowley Road**
 - i. name, address, telephone number of caller
 - ii. nature of emergency
 - iii. number of injured persons
 - iv. condition of injured persons
 - v. medical treatment of injured persons
 - vi. specific directions to locate emergency scene
 - vii. other information as requested by dispatcher
 - c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
 - a. Retrieve AED
 - b. Medical kit with emergency forms
 - c. Splint bag as needed
4. Direction of EMS to scene
 - a. Provide specific directions to locate emergency scene:
HFSMS Fine Arts Hall is located at northwest side of HFSMS campus. Enter HFSMS Fine Arts Hall in front parking lot, go through main entrance and turn right.
 - b. Assign someone to wait outside and bring EMS to scene
 - c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
 - a. Notify guardians or next of kin of injured persons
 - b. Assign a staff member to accompany injured persons to hospital when available
 - c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.

Safe Shelter will be:

- CHS Campus

All athletes and coaches will need to gather all belongings to take inside with them. Student-athletes will NOT be allowed back outside to retrieve personal items. In case of Tornado warning move to interior building hallways and rooms. Stay away from doors and windows.

AED Location:

1st Location: **Main Building** in band hall hallway.

2nd Location: **Main Gym** hallway by restrooms.

HFSMS Practice Field

Emergency Action Plan:

1. Establish scene safety and immediate care of the athlete
 - a. Keep bystanders away from scene
 - b. Primary survey to determine consciousness, breathing, pulse, and/or life threatening injuries
 - c. Provide emergency care until EMS arrives
2. Activation of the Emergency Medical System
 - a. Making the Call: **911**
 - b. Providing Information: **940 North Crowley Road**
 - i. name, address, telephone number of caller
 - ii. nature of emergency
 - iii. number of injured persons
 - iv. condition of injured persons
 - v. medical treatment of injured persons
 - vi. specific directions to locate emergency scene
 - vii. other information as requested by dispatcher
 - c. Stay on the phone until EMS arrives
3. Emergency equipment retrieval
 - a. Retrieve AED
 - b. Medical kit with emergency forms
 - c. Splint bag as needed
4. Direction of EMS to scene
 - a. Provide specific directions to locate emergency scene:
Practice Field access on east parking lot. Enter gate on west side of practice field.
 - b. Assign someone to wait outside and bring EMS to scene
 - c. Assure necessary gates and doors are unlocked and accessible
5. Other protocols
 - a. Notify guardians or next of kin of injured persons
 - b. Assign a staff member to accompany injured persons to hospital when available
 - c. Contact administrators and complete emergency reports

Severe Weather:

An announcement will be made to clear the fields and gyms and proceed to safe shelter.

Safe Shelter will be:

Main Building (Athletes will be escorted by coaches to locker rooms)

Concession/Restroom Buildings

Spectator Vehicles

*Underneath the bleachers is not considered safe shelter.

All athletes and coaches will need to gather all belong. Stay away from doors and windows.

Tornado Warning/Alert

In the event of a tornado alert, coaches and officials will be told to vacate the field and bleachers.

Safe Shelter will be:

Main Building for everyone

Concession/Restroom Buildings

All athletes, coaches, and spectators will proceed to main part of building and get into hallways. CISD

Administrators and security will facilitate.

Evacuate the premises as soon as a tornado warning has been issued for Tarrant County.

Coaches will escort all athletes to locker rooms and follow the school's emergency weather protocol.

Spectators will be notified of warning and advised to seek safe shelter.

AED Location:

1st Location: **Main Gym hallway by restrooms.**

2nd Location: **Main Building in band hall hallway.**

HFSMS Tennis Courts

Emergency Action Plan:
